

Dr. Louis Meuleman is Chair of the Stakeholder Forum for a Sustainable Future, Chair of the Scientific Committee of the European Environment Agency, and Vice-Chair of the UN Committee of Experts on Public Administration. He has an MSc in biology, a PhD in public administration, and is a Guest Professor Politics & Public Governance at Antwerp University and Visiting Professor Public Governance at KU Leuven University. Louis is a former public manager of environmental sustainability at several government levels. He has written books on policymaking with stakeholders (2003), combining hierarchical, network, and market governance styles (2008), and (meta)governance for the SDGs (2018).

Dr. Stefan Bauernfeind is the head of the Division "Sustainable Consumption, Sustainable Product Policy" at the German Federal Ministry for the Environment, Climate Action, Nature Conservation and Nuclear Safety. After studying law, obtaining a doctorate in the field of environmental law, and passing the second state legal examination, he first served as a judge in Berlin before working for the Federal Ministry for Environment, Nature Conservation and Nuclear Safety. From 2004 to 2024, he worked for the Federal Chancellery in Berlin, being responsible within the German Government for the Sustainable Development Strategy, a position he held as a head of division from 2010 onwards.

Mr. Juwang Zhu is Director of the Division for Public Institutions and Digital Government and Acting Director of the Division for Sustainable Development Goals at UN DESA. He has led major UN initiatives supporting the Sustainable Development Goals, including the High-level Political Forum and Rio+20. Since joining the UN in 1985, Mr. Zhu has held senior roles in policy, management, and capacity building. He holds degrees from Shanghai International Studies University, the University of London, and Webster University.

Doreen Robinson is Deputy Director of the Ecosystems Division at UNEP in Nairobi, supporting global work in biodiversity, land degradation, marine and freshwater, and disaster response. Previously, she led UNEP's Biodiversity and Land Branch, advancing one health, sustainable food systems, and multilateral agreements. With nearly two decades at USAID, she managed programs focused on biodiversity, water, climate, and energy across 14 Southern African countries. Earlier, she worked with a variety of civil society organizations, including the World Wildlife Fund. Doreen holds degrees in Conservation Biology and Sustainable Development from the University of Maryland and Animal Science from Cornell University.

Dr. Marianne Beisheim is a senior researcher at Stiftung Wissenschaft und Politik, German Institute for International and Security Affairs, specializing in sustainable development governance and the 2030 Agenda. She serves on the UN-Political Advisory Board of the German Foreign Office, the Research Council of the United Nations Association Germany, and the Leadership Council of SDSN Germany. Previously, she was an Assistant Professor at Freie Universität Berlin, where she led research on multi-stakeholder partnerships for sustainable development. Dr. Beisheim is widely published on UN reforms and sustainability governance.

Dr. Morgan Seag is the Senior Representative to the UN System for the International Science Council (ISC), where she facilitates knowledge brokerage and supports science-policy interfacing in the multilateral system. She has worked with a variety of governments, intergovernmental organizations, academic institutions, and non-governmental organizations to enhance evidence-informed decision-making, focused primarily on sustainable development, climate change, and gender equality. She has a PhD in Geography from the University of Cambridge and a BA in Political Science from the University of Pennsylvania.

Dr. Ingeborg Niestroy is a Researcher with work on both sides of the science-policy interface, and she has worked for and about it, inter alia as Secretary General of the European network of advisory councils for environmental policy and sustainable development (EEAC), and the German Science Platform Sustainability 2030 at the RIFS, as well as on the NGO side with SDG Watch Europe. She specialises in governance for sustainability, with comparative analyses at (sub)national, EU, and global levels. More recently, she has focussed on multi-stakeholder participation and democratic innovations for involving citizens, and is looking forward to expanding this with Stakeholder Forum.

Kehkashan Basu is a Canadian environmentalist who is the Founder-President of Green Hope Foundation, which works across 28 countries, empowering over half a million people. She is the recipient of Canada's Meritorious Service Medal and has been recognized as a UN Human Rights Champion, Forbes 30 Under 30, National Geographic Explorer, and one of Canada's Top25 Women of Influence. She has spoken at 500+ UN and international fora. She serves on the board of several international organizations, such as the International Leadership Association. Kehkashan holds a BA from the University of Toronto and an MBA from Cornell University.

Mr. Divine Ntiokam is the Founder and Executive Director of the Global Climate Smart Agriculture Youth Network, which is active in over 170 countries. He has supported United Nations food systems planning, advocated for youth participation in global development, and led translation efforts for the 2030 Agenda. Divine has served as African Continental Vice President of a youth leadership initiative, is an International Ambassador for a food and land use coalition, and actively contributes to the International Union for Conservation of Nature's commissions and the World Food Prize Foundation's youth programs.

Dr. Eeva Furman works at the prime minister's office as chief specialist and the secretary general of Finland's commission on sustainable development. She was part of the independent group of scientists (IGS) who wrote The Global Sustainable Development Report (GSDR2019). She has been chairing Finland's expert panel for sustainable development (2016-2022) and working as a professor and director (environmental governance) at the Finnish environment institute Syke until 2022. She has been part of the team developing the Societal Sustainability Assessment for Finland.

David O'Connor is a former Permanent Observer to the United Nations from the International Union for Conservation of Nature and is a Stakeholder Forum Fellow. Previously, he led the United Nations team that substantively supported the UN General Assembly Open Working Group, which crafted the Sustainable Development Goals. Before that, David worked at the Organisation for Economic Co-operation and Development (OECD) Development Centre in Paris, addressing sustainable development challenges of emerging economies. He holds degrees from University College London, the University of Wisconsin at Madison, and Yale University.
